FOR YOUR HOME & FAMILY

**99% less
foreign oil**

Making tomorrow better for all of us

Made in America. It makes us all walk a little taller and stand a little prouder. That's why we're always working to make Florida more energy independent by reducing our use of foreign oil by more than 99 percent – more than 40 million barrels a year down to less than 350,000. In its place, we're using clean, U.S.-produced natural gas and our state's very own sunshine.

In fact, on every sunny day, we're producing electricity for your family from three solar energy centers throughout Florida. And, we're combining it with affordable natural gas to make sure you have clean energy around the clock. See how we're changing Florida's energy today for a better tomorrow:

FPL bills are getting even lower

A 1,000-kWh FPL electric bill is already about 7 percent lower than it was five years ago, and now it's about to get even lower. In fact, pending regulatory approval, our typical customer is expected to save nearly \$2 a month starting in January. Calculate your savings:

Tools to help you save

We offer several programs that can help you save energy and money. Here are just a few of those services, which are available to you by visiting FPL.com/inhome or calling 1-800-DIAL-FPL (1-800-342-5375):

- » **Walk-through audit:** In this free evaluation, our energy expert will visit your home, identifying energy-saving opportunities and rebates available to improve your home's energy efficiency.
- » **Computer-assisted audit:** In a more detailed evaluation costing \$15, we'll also estimate potential savings, installation costs and the payback period of each recommendation.

A Building Energy Rating System survey is also available. It rates your home according to the current Florida energy-efficiency code requirements for new home construction and may help you qualify for improved mortgage options or increase your home's resale value. New or existing homes can apply for a Class 1 or 2 rating survey, which involves an on-site inspection. The cost for homes up to 2,000 square feet* is \$480, or \$555 with an air-conditioning duct leakage test, which includes one handler. Add \$35 for each additional handler. At a cost of \$75, the Class 3 rating option is for new construction only and is based on site plans and construction documents.

**Note: For Class 1 and 2 surveys, there is an additional charge of 8 cents per square foot for homes greater than 2,000 square feet, or 3 cents per square foot for a Class 3 survey.*

Stay safe, stay far away

Don't forget, always stay more than 10 feet away from power lines. If you see a power line that is down or looks hazardous, call 911. Learn more safety tips at:

Ask the Energy Expert

Q Does it cost more to run a refrigerator in the garage due to higher temperatures?

- Diane W. from Boynton Beach

A That is a great question. Yes, a refrigerator in a garage can cost a little more to run. See what causes the difference at:

Success story: How to make your dollars stretch further

FPL's typical residential bills are already the lowest in the state, but we strive to help customers save even more. Learn how former New Yorker Jim P. is using our tools to take control of his energy use now that he's made the Sunshine State his permanent home. Find out his secret to saving at:
